- Neural Network. BIT (Jhansi)
- Network Security BIT (Jhansi)

PROJECTS

1- Name : Enhancing the Performance of General Search Engine.

Client : College Project.
Technology : Data Mining , Web Mining , ASP.Net.
Role : Logic Developing , Concept Generate.

Detail :This is a Dissertation that enhance the performance of search engine, by using   concept of Data mining and web mining. In this we made a Meta Search engine that work's over many Server and gives that gives the Exact-result   what we want to get.This concept gives the Required result what we are searching not other related link's, and itReduce the time of searching .

2- Name : Minimal Connected Dominating Set formation in Wireless Ad –Hoc Network.

Client : College Project.
Technology : C++ , XP –Platform.
Role : Logic Developing Programmer.

Detail : This is also an Dissertation , By using this concept we can reduce the No. of Nodes (mobile)In mobile ad-hoc network, and can send the information / msg   from source to destination. In wireless ad-hoc network , due to blind broadcasting a problem occurs that is called Overhead. By using this concept we can remove this problem.

Subject Specialization

- HCI
- Neural Network
- Network Security
- DBMS
- DATA Communication
- Data Structure
